REANNZ FileSender
Send large files quickly and securely

Use REANNZ FileSender to bypass email limitations and share large files, such as research data, simply and securely with colleagues anywhere in the world.

FileSender is a powerful and user-friendly file-sharing service designed to simplify the process of exchanging files securely and efficiently over the internet. Unlike traditional methods of file transfer, FileSender eliminates the need for email attachments and overcomes the limitations posed by file size restrictions. It provides a seamless experience, ensuring files reach their intended recipients swiftly and securely.

FileSender simplifies the file-sharing process through a straightforward interface. Users can upload files of up to 5 Terabytes in size and in any format with the added advantage of encryption protocols, ensuring that your files remain confidential during transit. Files only reach their intended recipients – and no one else. This makes FileSender a popular choice within the science, research, and education communities worldwide.

FileSender is a federated service, which means your institution must be a Tuakiri user to enable access.

Key Features

Robust file transfer
Move data efficiently, securely, and reliably between users within New Zealand or around the world.

Easy to use
FileSender is web-browser based and easy to use.

Recipient doesn't require an account
Once the files have been uploaded, the recipient will get a link and optional password to download the files, without the need to create an account.

Send multiple large files
Transfer up to 30 files at a time with a combined maximum size of 5 TB per upload.

Secure and encrypted.
Senders have full control over who receives and can access the files and for how long. Add an extra layer of protection with password encryption. This ensures that only someone who possesses the password can read the file.

Set an expiry date
For short-term or time-sensitive material, an expiry date can be set so that a file can only be accessed for a limited time, the default (and maximum) for all files is 15 days.

FileSender vouchers
Send a voucher to a nominated non-Tuakiri colleague so they can exchange files with you through FileSender.

Cost of service
FileSender is a value-add service, available to REANNZ members at no additional cost.

Link tracking
See who has downloaded and accessed the files you have shared and how many times they have been accessed.

FileSender on the REANNZ network

REANNZ connected

Leverages the REANNZ high-performance national and international connections for fast data transfers across the network.

Hosted in New Zealand
